PROFESSIONAL SUMMARY

Senior iOS Developer with 6 years of experience building and modernizing enterprise, hospitality, SaaS and consumer applications across iPhone, iPad and Apple TV platforms using Swift, SwiftUI, UIKit, Combine, GraphQL and Clean Architecture.

EXPERIENCE

Hudini

SIRO: <https://apps.apple.com/in/app/siro-hotels/id6450212770>, Manual MDM Build Release(Royal Mansour Marrakech, Mandarin Oriental Emirates Palace, Royal Mansour Casablanca, Mandarin Oriental Downtown Dubai, Windsor Court, Taj & Proper Hotels)

📅 July 2023 – Ongoing

📍 Bangalore, India

- Modernized legacy UIKit modules by introducing SwiftUI, MVVM, Dependency Injection and Async/Await, improving maintainability and accelerating feature delivery.
- Provided technical guidance to junior developers, participated in code reviews and contributed to architecture discussions across multiple projects.
- Developed and maintained 15+ hospitality applications across iPad and Apple TV platforms for luxury brands including Royal Mansour, Mandarin Oriental, Raffles Doha, Emirates Palace, Proper Hotels and Taj.
- Designed reusable networking and repository layers using generics, GraphQL and REST APIs reducing feature implementation effort by 50%.
- Worked directly with hospitality clients across US, EMEA and MENA regions to translate business requirements into production-ready mobile solutions.
- Led feature estimation, technical design discussions and stakeholder communication for multiple hospitality projects across iPad and Apple TV platforms.

BlueSecures- India & APAC

<https://apps.apple.com/in/app/bluesecures/id1545560889>

📅 Jan 2021 – July 2023

📍 Bangalore, India

- Worked in an **AGILE environment** to develop and maintain BlueSecures universal iOS application(B2B SaaS official messaging application) using Swift and **Socket Programming** from scratch to publishing in AppStore.
- Used Multiple **Encryption** techniques so as the content is not readable by other tools, multipart Upload, Batch Database Executions in Swift.
- Acted as a technical lead on modules, assisting with solution design and collaborating with developers through Git/TFS.
- Implemented multithreaded workflows using GCD to optimize real-time messaging, synchronization and background operations.
- Took **ownership** of major functionalities like Push, Pull, Socket, Sync across different mediums(Solo Hand-idly).
- Worked on **application optimization**, reduced the load time, lags on the app by 6-7 seconds by optimizing API calls and Func/Method calls.

EDUCATION

B.Tech in Computer Science

Uttarakhand Technical University

📅 2016 – 2020

KEY SKILLS & TOOLS

SwiftUI UIKit MVVM GraphQL

Dependency Injection Async/Await

Combine Clean Architecture Unit Testing

SOLID Repository Pattern

iOS SDK Agile/Scrum APIs Adyen

SDLC XCTest RESTful APIs Xcode IDE

Swift CocoaPods Alamofire TDD

Ejabbered Core Data APNS JSON

ShareExtension Git/ TFS XMPPFramework

ACHIEVEMENTS

Google Community Developer

Published Google Actions for over an year

AR(Augmented Reality) based iOS Project(Major)

Developed application was capable of utilising the modern technologies to depict imitations on a sheet of paper with audio-visual aids

Python based an Interactive program with limitless capabilities(Minor)

Developed program was capable of interacting with the user and performing tasks like surfing the web, opening an application, sending an e-mail with just the use of voice commands

WAC-IITR-273

Participated in AI with Machine Learning Workshop at IIT Roorkee
